

Fact Sheet

What: Victor Access Management Plan is the proactive management of vehicular access points to land parcels adjacent to roadways through planning, design and implementation of land use and transportation strategies balanced against the property owner's right of access.

The draft Victor Access Management Plan and additional project information can be found at: <http://www.co.ontario.ny.us/1662/Victor-Access-Management-Plan>

Why: Good access management promotes safe and efficient use of the transportation network. Access management provides the following benefits:

- Preserves integrity of the roadway system
- Improves roadway safety and capacity
- Provides a more efficient (and predictable) motorist experience
- Improves travel times through a corridor
- Promotes sound public investment in infrastructure
- Promotes private investment in properties

How: The Victor Access Management Plan will improve mobility and safety for the local roadway system by providing a coordinated overall plan with recommendations for standards, guidelines, local laws and a framework for future infrastructure investments and development reviews.

Where: Town-wide & Village-wide

Schedule: Property owner meeting #1 - March 6th, 2019 8:30-10:30 AM
Property owner meeting #2 - March 7th, 2019 4:00-6:00 PM
Public Meeting - TBD
Draft Plan in Spring 2019 & Final Plan June 2019.

Who: LaBella Associates has been retained to develop the Town and Village of Victor Access Management Plan to improve mobility and safety for the local roadway system. A Steering Committee comprised of representatives from the Town, Village, Ontario County Planning Department, NYSDOT and the Genesee Transportation Council is providing project oversight and technical input.

Project Objective

The objective of the Victor Access Management Plan is to improve mobility and safety for the local roadway system by providing recommendations for standards, guidelines, local laws and a framework for future infrastructure investments and development reviews. The Access Management Plan will provide a coordinated overall plan with the appropriate balance of proactive access control to individual parcels and safe and efficient traffic flow preserving the capacity and connectivity of roads within the Town and Village.

The Access Management Plan Document will:

- Analyze traffic & land use trends to make reasonable Access Management decisions and recommendations to protect the roadway system
- Develop Best Management strategies for Town-wide and Village-wide application
 - ❖ Standards, guidelines, subdivision regulations, zoning
- Focus on Priority Action Areas for specific recommendations:
 - ❖ Individual recommendations associated with existing development
 - ❖ Individual recommendations to be considered when future development warrants
- Produce Town & Village Access Management maps with recommended future roads and connection points to existing roadway network

The Implementation Tools include:

- Comp plan update, Official Map adoption, Revisions to local laws, Development Standards, Memorandums of Understandings, SEQR coordinated reviews and Environmental Assessment Forms
- Framework for development reviews & infrastructure investment
