## Did you know?

According to the National Survey of Children's Health, youth with special health care needs are more likely to have their daily activities affected by their health conditions, miss 11 or more school days in a year, and have trouble making or keeping friends. Families of CYSHCN report higher out-of-pocket medical expenses, spend more time coordinating their child's health care, and report reducing or stopping work due to their child's health. We are here to help. Call us today!
